# Commercial Construction

Through our years of experience in commercial ground-up builds and remodels and additions, BCI has proven time and again that our tight focus on quality, cost management and schedule completion make us an invaluable business partner.

BCI is proud to be a family owned and run company with a mission to apply cutting-edge construction technologies while providing a safe, rewarding work environment for our employees.

## Why BCI?

BCI offers you the most economical solutions without sacrificing efficiency or quality.

### Value

During construction, we utilize value engineering to ensure we apply the best, most cost-effective technologies to keep your project on budget.

### Communication

Our strong communication and coordination abilities allow your existing operations to continue seamlessly by reducing disruptions and preventing scheduling conflicts. Frequent team meetings ensure all issues are addressed in a timely and proactive manner.

### Expertise

We leverage recognized technical experts to provide full-service expertise throughout all phases of your project.

### Support

We remain your partner after construction is complete. We offer customized post-build services to provide quick, economical repairs, as well as future upgrades.

## Services

- Construction Management
- Turnkey Construction
- Alternative Project Delivery
- Maintenance & Repair
- General Contracting

“We could not have had the renovation of our old building in better hands than with all involved with Building Crafts, Inc. They were very accommodating and knowledgeable on how to construct a second theatre room from a dilapidated building not previously a theatre...Our second screen is second to none and we are very proud to have this project completed....We could not have completed this project without them! ”

**- Jeanice Lester, Red Oak Expand Grand Treasurer & Theatre Board Member**

## Project Highlight:

### Red Oak Grand Theatre

BCI was honored to take on the task of restoring—and expanding—the historical Red Oak Grand Theater. An impressive 3,500 square foot addition included a second theater for multiple screenings. We remodeled the existing lobby, and a new concession stand, ticket booth and new ADA accessible restrooms gave new life to the existing space. Finally, new structural wood framing and a new EPDM membrane roofing system ensures that this community hub will stand strong for years to come.
